

METHOD AND APPARATUS FOR FORMING A LAP SEAL USING  
A FOLDED ROLL OF FILM

ABSTRACT

Folded film (10) used to create a lap seal using an L sealer (50) includes  
5 a first film (12) folded substantially in a form of a "J" and a second film (14) overlapping at least a portion (16) of the first film. The first film and the second film are coupled together (19) in at least a portion of an overlapping area.
